**Figure 5: Molecular Subtypes Predict Drug Response**

A. Venetoclax Sensitivity by Subtype
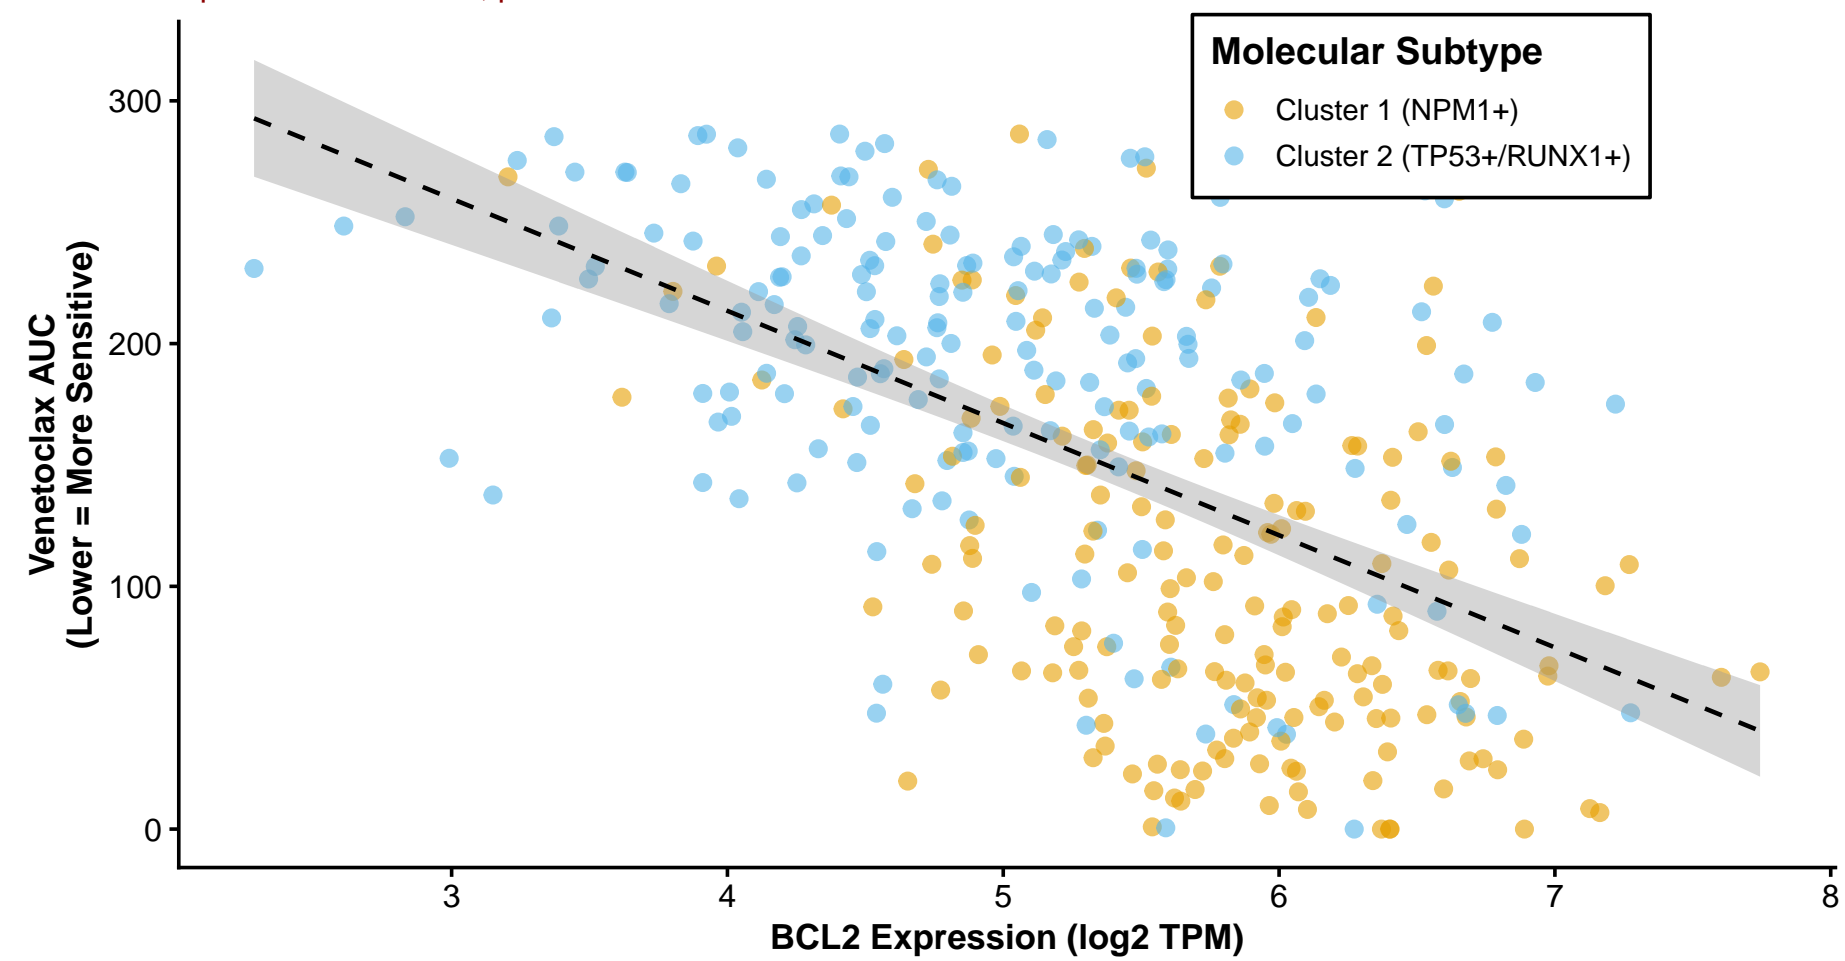

p = 2.78e−24 (FDR = 4.31e−22), Cohen's d = 1.25

Cluster 1 is 1.79× more sensitive to Venetoclax

B. BCL2 Expression Mechanism

Spearman . = −0.552, p < 10^−30

Higher BCL2 expression −> Greater Venetoclax sensitivity
