

A. Orthogonality with Prognostic LSC17

Spearman Rho = -0.08 (p = 0.13) | Independent biological axes

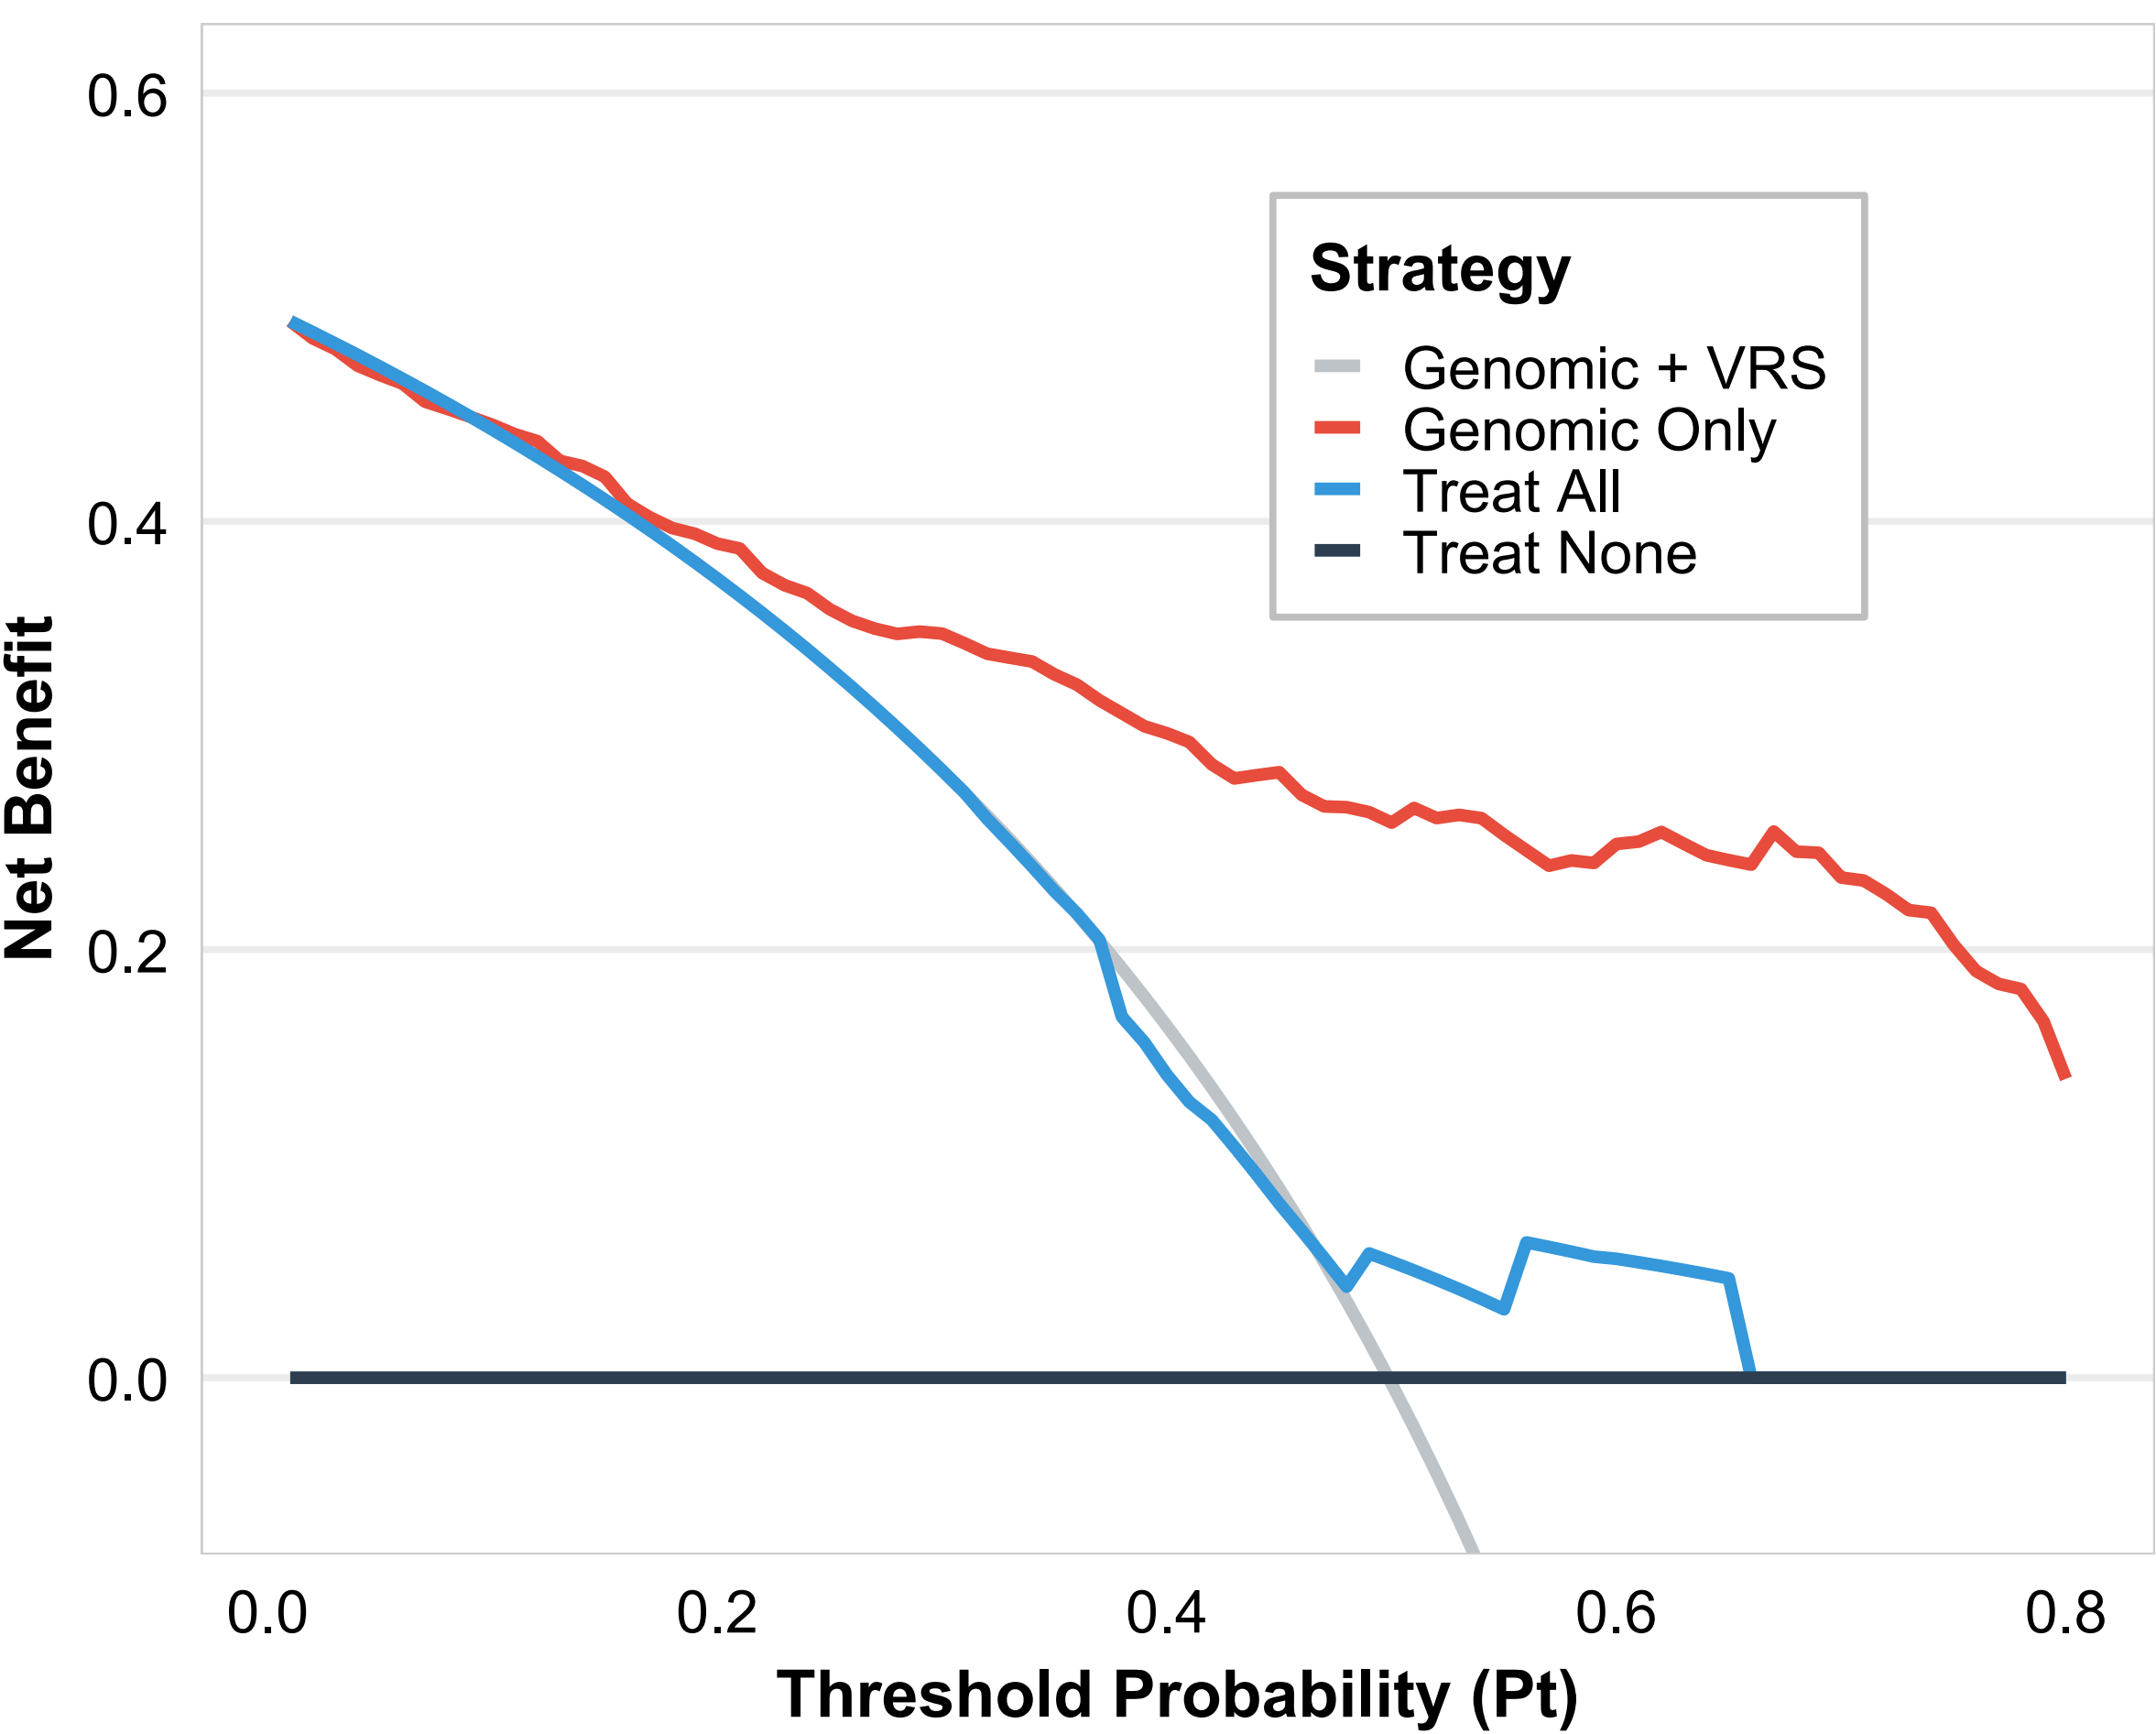

B. Predictor Discrimination (ROC Curves)

VRS predicts Venetoclax ex vivo response; LSC17 is non-predictive

C. Clinical Utility (Decision Curve Analysis)

VRS adds massive clinical net benefit beyond genomics

D. Global Bootstrap Stability

95% CI: [0.821 - 0.875] (N=1,000 runs)
