

A. Therapeutic Class Opportunities (Cluster 2)

Effect size (Cohen's d) and FDR significance for preferentially sensitive agents

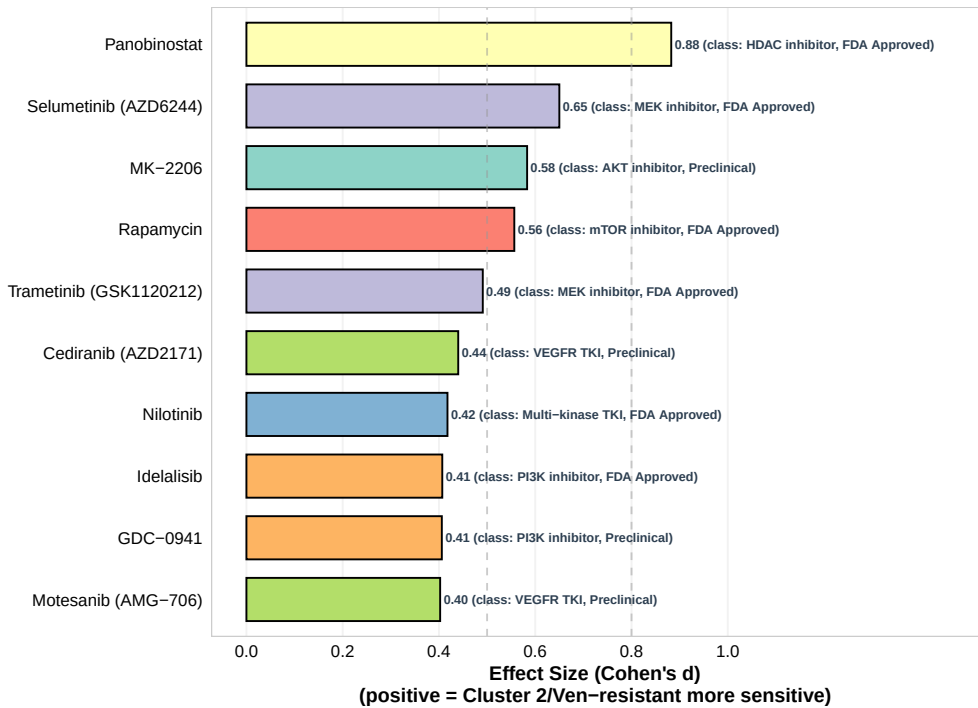

B. Cluster-Specific Sensitivity Profile

Top 15 drugs differentially sensitive per cluster

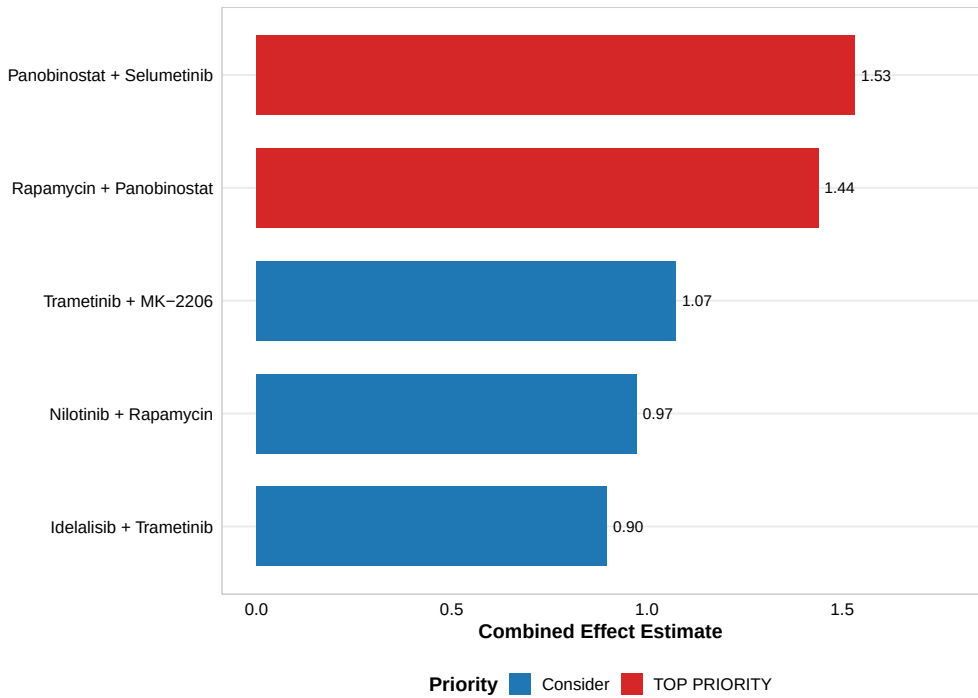

C. Top 10 Salvage Candidates (Cluster 2)

Ranked by effect size (Cohen's d) with availability

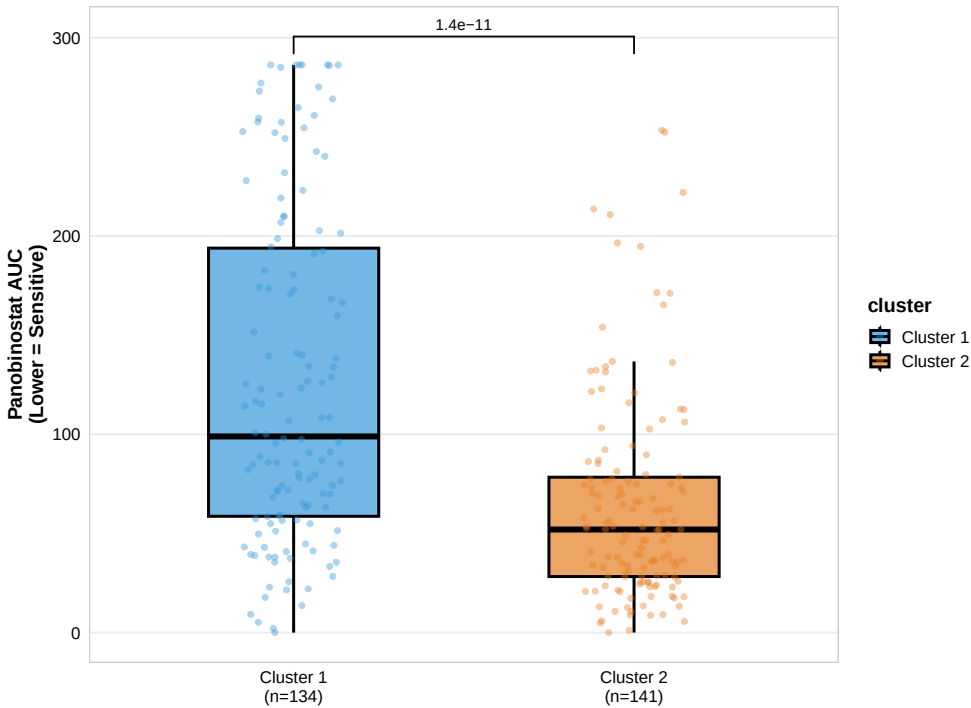

D. Combination Therapy Candidates (Cluster 2)

Combined effect estimates (sum of individual Cohen's d)

E. Panobinostat Patient Response

HDAC inhibitor, FDA approved

F. Selumetinib Patient Response

MEK inhibitor, FDA approved
