

A. BCL2 Target Expression vs. BCL2 Dependency

Higher BCL2 expression predicts stronger BCL-2 dependency

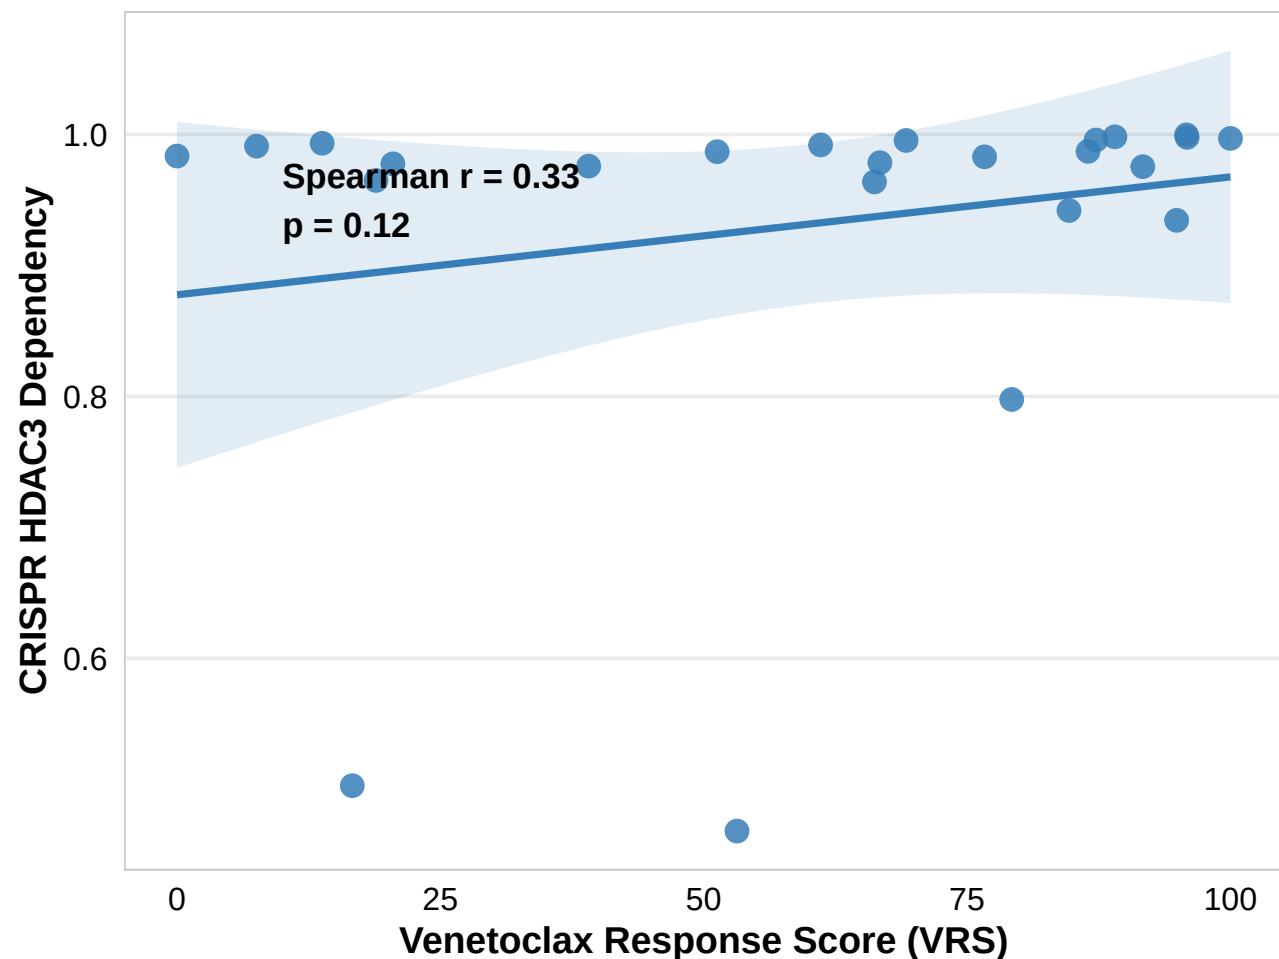

B. BCL2/MCL1 Ratio vs. BCL2 Dependency

Relative BCL-2 to MCL-1 abundance shifts dependency profiles

C. HDAC3 Dependency vs. VRS

Lower VRS (resistant) aligns with greater HDAC3 vulnerability

D. MAPK1 (ERK2) Dependency vs. VRS

Lower VRS (resistant) aligns with greater MAPK1 vulnerability
